Charlie Says!

by Charlie Viosca

I begin this column by asking the membership for anyone that would like to volunteer for the job of Treasurer. John Icenhower is leaving that post at my request because I have another more important volunteer position for him to fill.

Anyone wishing to volunteer for Treasurer of the Victoria Association please write or E-mail me. John is writing up a job description of the position but it will not be ready in time for the Bustle. It is not a very hard job to do and anyone doing it will be doing an important job for the Victoria Association. The treasurer is a member of the Board of Directors and must be a member of both MAFCA and MARC. At this time I will not reveal what John Icenhower's new job will be until we have a new treasurer.

I am in the process of installing high speed internet to my computer. Hopefully it will be complete by April 6th. I will keep my AOL E-mail address for a month or two until everyone gets the new E-mail address which will be: cjviosca@bwdmail.net.

I will be at the MAFCA National Convention in Massachusetts to present the MAFCA Youth Restoration Awards. I will also preside over the Victoria - body style group - meeting to be held on Friday, July 21st from 2:00 PM to 4:00 PM. I hope to see all of you convention attendees there. ☺

On The Cover!

Back in the 1930's money was tight so instead of taking a car to a service station to have the radiator back-flushed many Model A owners would use a local creek. The owner would remove the lower radiator hose and drive the car into the creek enough so that the lower part of the radiator was under water and then simply run the engine backwards for a while. ☺

Engine Re-Babbitting!

by Bill Barlow

Since 1989 our local chapter of MAFCA, High Desert A's of Central Oregon has been learning and mastering the art of pouring and machining the babbitt bearings for Model T, A and B engines. For the first 8 years of our project we worked on engines belonging to members of our local chapter with a nominal fee charged for the cost of materials, supplies and some set aside to improve our equipment. In 1997 we were asked if we would do a babbitt job for a member of another chapter in a neighboring state. After a discussion and vote at a chapter meeting we decided to give it a try. Since that first engine, we have completed several hundred main bearing jobs for Model A folks from other chapters in the Northwest. The charge for mains is \$250.00 with \$200 going to the club treasury and \$50.00 to replace supplies and materials. We charge an additional \$25.00 for T and B engines because most of our KR Wilson babbitting equipment is for the A engine and we have to use the slower more universal equipment on the T and B jobs. The rods are an additional \$150.00 exchange and are fitted to the crank at the time of the main bearing babbitt work.

I would like to invite any member of any Chapter or Special Interest Group such as the Victoria Association to a private seminar to learn the process with the intention of setting up a like program in other parts of the country. We have presented a training seminar to the Gallopin Gerties of Tacoma Washington, The Pacific A's from Vancouver BC Canada and the Rogue Valley A's from Medford Oregon but only the Pacific A's have set up a club project. The other two are still bringing their engines to us.

If interested in learning babbitt work with the intention of using it for a club fund raiser or need an engine babbitted for your Model A please give me a call at 541 389 2694 Pacific Time. ☺

Dear Charlie

I am very happy to inform you that our daughter, Julie Mac Donald will graduate with full honors Cum Laude, this May 2006, one full year ahead of schedule receiving a Bachelors degree in Psychology, with a major in Criminal Adolescent Behavior.

Financial support to her as a recipient of the MAFCA Scholarship award, helped and I must say went a long way to contributing to her success and self-esteem during the past three years. The MAFCA Scholarship monies "Took the BITE", out of the cost of books and student supplies.

Julie's plans are to pursue a PhD in Clinical Physiology and she is now interviewing for fellowships associated with advanced study in that field at several graduate universities.

For my small part, I wish to extend my sincere thanks to MAFCA and the VICTORIA Club, and to encourage every member to think ahead and make a contribution to the 2006 scholarship fund. Thinking along that line the 4th payment you would have awarded to her this year should now be awarded to a deserving individual, starting the whole process over again....

For Graduation day, Dad and the Lady of Honor and her Mom will be tooling around campus to the sooooooth-ing sounds of Ahooguh-Ahooguh.

Again:

Thank you for the leadership and encouragement, MAFCA is enriched by members setting the pace, looking forward and caring about preserving the past.

Cheers From Boston

Peter Mac Donald

Minute Man Model A Ford Club

Pinion Gear Removal!

by Tom Endy

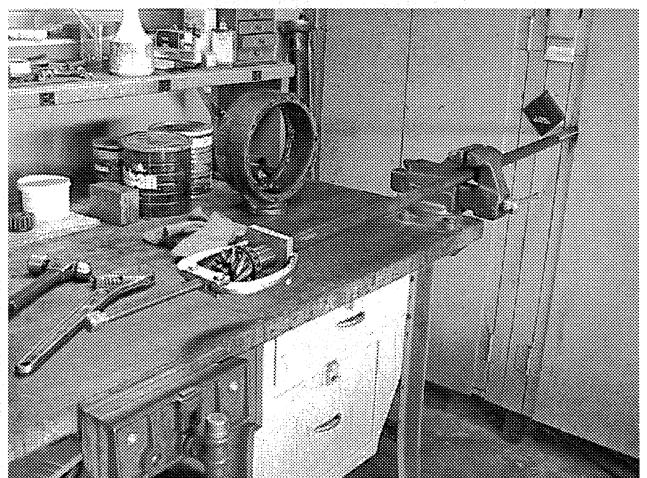

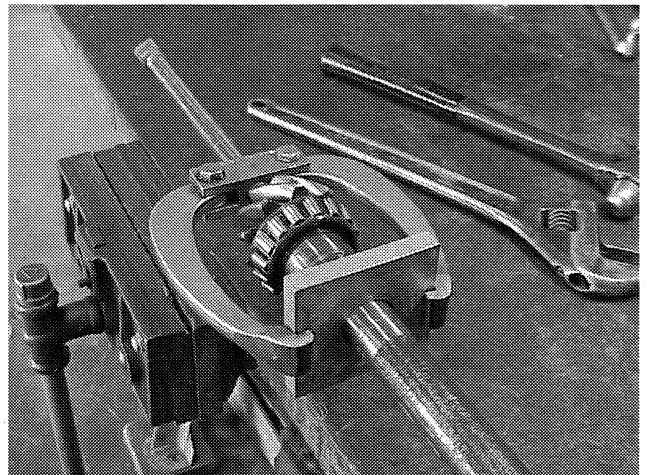

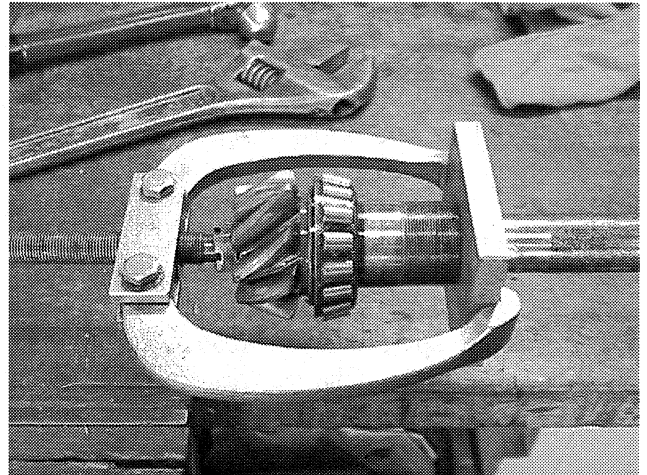

Removing a Model A Ford pinion gear from the drive shaft is not as straightforward as it may appear. The pinion gear has an internal taper that matches the tapered end of the drive shaft and over the years the mating surfaces may have become jammed very tight together, much like a rear brake drum hub can become jammed tight to a rear axle.

The pinion gear can be removed from the drive shaft with a large gear puller and a small bearing puller. Place the drive shaft in a vice. Remove the cotter pin from the nut at the pinion end of the drive shaft. Using a 15\16 hex socket, back the nut off about 1/4 of an inch, but do not remove it. Place a small bearing puller around the drive shaft behind the pinion gear by sliding it on over the front end of the drive shaft until it is up against the threaded end of the pinion gear. Using the gear puller, place the center point of the puller in the détenté at the pinion end of the drive shaft. Hook the arms of the gear puller around the bearing puller and tighten until there is sufficient tension against the end of the drive shaft. Smartly tap the end of the gear puller with a hammer. Alternately tighten the puller and tap the end until the pinion gear breaks loose from the taper on the end of the drive shaft. Remove the pinion gear nut and slide the pinion gear off the end of the drive shaft.

The photos show a block of steel with a hole bored through it instead of a bearing puller. Since I remove a lot of pinion gears I made up this device, as it is more convenient to use. A small bearing puller will work just as well.

The gear puller shown was purchased from Sears years ago and was originally used for pulling flywheels off of Briggs & Stratton lawn mower engine.

The reason you do not want to remove the nut from the end of the drive shaft until after the pinion gear has broken loose is that the pinion gear may fly across the room when it breaks loose if the nut is not in place to prevent it. ☺

Bits & Pieces!

FOR SALE:

(3) 1931 Model A Ford Victorias. Complete ground up professional restoration. National show cars, many NOS parts, minimally driven. LB interior, indented firewall, all new wood, Plasmeter cast iron drums, counter balanced crank, V8 clutch and cut down flywheel. Hardened valves, Firestone WW tires, rear spare with SS tread cover & black painted side cover. Chassis restored by Wiley Higgins, wood graining by Bennie Estes.

2-\$25,000 each – Steelback Ford maroon with black fenders and reveals, vermilion red wheels and pin striping.

1-\$27,000 – Leatherback Washington blue with Riviera blue reveals, black fenders and Tacoma cream wheels and pin striping. Tan vinyl top.

Health forces sale:

Lanny Hudson

350 Coal Creek Rd.

Redstone, CO 81623-9155

Phone: 970-963-3239 (after 6 PM Mountain time)

MAFCA National Convention Mansfield, MA July 16-22, 2006

The MAFCA National!

Then MAFCA national convention will be hosted this July by the Model A Restorers Club of Mansfield, MA. You may sign up by contacting the committee registrar.

Pat Zwicker, Registrar

9 Clapp Street

Norton, MA 02766

Phone: 508-285-3211

e-mail: a29lady@aol.com

Victoria Association!

Patches and Decals:

The Association has a supply of Victoria jacket patches and window decals available for \$3. each, which includes mailing. To order send payment to:

Vern Schwebke

9330 Kahlua Way

Spring Valley, CA 91977

Scholarship!

The Model A Ford Youth Scholarship program, sponsored by the Victoria Association will present the annual scholarship awards at the MAFCA national convention in July.

Restoration Award!

The Model A Ford Youth Restoration awards will also be awarded at the MAFCA national in July.

The International Model A Ford Victoria Association is a body style chapter of the Model A Ford Club of America (MAFCA) and a region of the Model A Restorers Club (MARC). The association was founded in 1986 at Frisco, Texas by Charlie Viosca. The purpose of the association is to aid the membership in the authentic restoration of the Model A Ford A-190 Victoria body style. To achieve the purpose this periodic newsletter is published for the association membership. The intent is to furnish accurate and complete information concerning the Model A Ford Victoria body style. Permission to reprint or quote from this publication is expressly given provided acknowledgement and credit is given to the author and to the publication
